

OUTPATIENT REHABILITATION

Neurological

ANDERSON

Regional Medical Center

Anderson Regional Medical Center offers outpatient Rehabilitation therapy by highly trained physical, occupational and speech therapists for patients who have suffered from neurological impairments, including strokes. Outpatient rehabilitation therapy continues in our private treatment areas after a patient is released from an inpatient program. Treatment is available for patients of all ages for:

- Aphasia & Dysphagia
- Muscle Weakness
- Hemiplegia
- Gait Imbalance
- Right/Left Neglect
- Dysarthria
- Cognitive Impairments
- Apraxia
- Sensory Loss
- Neuromuscular Re-education

Facilities include: Fully equipped fitness center, life fitness circuit training and intervertebral decompression device.

Anderson — for quality of life.
